Detecting the Key...
Cancel
Oops, we couldn't detect the key!
We couldn't identify a key in this sheet music. Make sure the image is clear, well-lit, and contains a visible key signature. Try again or upload a different file.
Detection Successful!
It looks like your sheet is in C minor*.
* We only detect the dominant key. For more info, learn more here.

How We Detect Your Key
Transpose X simplifies key detection by identifying the dominant key in your sheet music. If a piece contains multiple key signatures, we focus on the most prominent one to keep the transposition process smooth and straightforward.
Why Do We Detect Only One Key?
• Many sheet music pieces modulate (change keys), making it complex to transpose every key accurately.
• To keep things user-friendly, we detect the primary key so you can quickly transpose without confusion.
• If your piece has multiple keys, you may need to manually adjust sections after transposition.
If you need more flexibility, let us know! We're always looking to improve. 🚀

About Us
Welcome to Transpose X, where music meets innovation. Our app is designed to make transposing sheet music effortless—whether from an image, a file, or a quick scan. We believe that musicians, composers, and educators should spend more time creating and less time manually adjusting notes.
Inspired by the challenge of making music more accessible, Transpose X was built with precision, speed, and simplicity in mind. Whether you're shifting keys for a performance, adapting music for different instruments, or just exploring new sounds, we provide a seamless, intuitive experience.
Join us in redefining the way musicians interact with sheet music. With Transpose X, the right key is always at your fingertips.
